Module:Documentation/doc

From Blue Gold Program Wiki

< [Module:Documentation](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This is the documentation page for [Module:Documentation](#)

This Lua module is used on [approximately 108,000 pages](#).

To avoid major disruption and server load, any changes should be tested in the module's [40px /sandbox](#) or [/testcases](#) subpages, or in your own [module sandbox](#). The tested changes can be added to this page in a single edit. Consider discussing changes on the [talk page](#) before implementing them.

This module is [subject to page protection](#). It is a [highly visible module](#) in use by a very large number of pages, or is [substituted](#) very frequently. Because vandalism or mistakes [40x40px](#) would affect many pages, and even trivial editing might cause substantial load on the servers, it is [protected](#) from editing.

This module displays a blue box containing documentation for [templates](#), [Lua modules](#), or other pages. The {{documentation}} template invokes it.

Normal usage

For most uses, you should use the {{documentation}} template; please see that template's page for its usage instructions and parameters.

Use in other modules

To use this module from another Lua module, first load it with `require`:

```
<syntaxhighlight lang="lua"> local documentation = require('Module:Documentation').main
</syntaxhighlight>
```

Then you can simply call it using a table of arguments.

```
<syntaxhighlight lang="lua">
documentation{content = 'Some documentation', ['link box'] = 'My custom link box'}
</syntaxhighlight>
```

Please refer to the [template documentation](#) for usage instructions and a list of parameters.

Porting to other wikis

The module has a configuration file at [Module:Documentation/config](#) which is intended to allow easy translation and porting to other wikis. Please see the code comments in the config page for instructions. If you have any questions, or you need a feature which is not currently implemented, please leave a message at [Template talk:Documentation](#) to get the attention of a developer.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
