Module:Flex columns

From Blue Gold Program Wiki

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This module is rated as [ready for general use](#). It has reached a mature form and is thought to be bug-free and ready for use wherever appropriate. It is ready to mention on help pages and other Wikipedia resources as an option for new users to learn. To reduce server load and bad output, it should be improved by [sandbox testing](#) rather than repeated trial-and-error editing.

[40x40px](#)

This Lua module is used on [approximately 5,000 pages](#) and changes may be widely [noticed](#). Test changes in the module's [/sandbox](#) or [/testcases](#) subpages, or in your own [module sandbox](#). Consider discussing changes on the [talk page](#) before implementing them.

[32px](#) This module uses [TemplateStyles](#):
• [Template:Flex columns/styles.css](#)

Usage

Implements {{[Flex columns](#)}}

```
local p = {}

local function setCleanArgs(argsTable)
    local cleanArgs = {}
    for key, val in pairs(argsTable) do
        if type(val) == 'string' then
            val = val:match('^%s*(.)%s*$')
            if val ~= '' then
                cleanArgs[key] = val
            end
        else
            cleanArgs[key] = val
        end
    end
    return cleanArgs
end

p.main = function(frame)
    local parent = frame.getParent(frame)
    local output = p._main(parent.args)
    return frame:extensionTag{ name='templatestyles', args = { src='Flex
columns/styles.css'} } .. frame:preprocess(output)
end

p._main = function(_args)
    local args = setCleanArgs(_args)
    local ii = 1
    local container = mw.html.create('div')
        :addClass('flex-columns-container' )
    while args[ii] do
        local column = container:tag('div')
            :addClass('flex-columns-column' )
            :wikitext(args[ii])
        if args['flex'..ii] then
            column:css('flex', args['flex'..ii])
        end
        ii = ii + 1
    end
end
```

```
end
    return toString(container)
end
```

```
return p
```

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
