```

for those rare occasions when article titles don't fit with the normal '<language name>-language', this table maps language code to article title. Use of this table should be avoided and the use of redirects preferred as that is the long-standing method of handling article names that don't fit with the normal pattern

```

This is a table of tables of transliteration standards and the language codes or language scripts that apply to those standards. This table is used to create the tool-tip text associated with the transliterated text displayed by some of the {{lang-??}} templates.

These tables are more-or-less copied directly from {{transl}}. The standard 'NO_STD' is a construct to allow for the cases when no |std= parameter value is provided.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
