Module:No globals/doc

From Blue Gold Program Wiki

< [Module:No globals](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This is the documentation page for [Module:No globals](#)

This Lua module is used on 14,600,000+ pages, or roughly 819304% of all pages.

To avoid major disruption and server load, any changes should be tested in the module's [40px /sandbox](#) or [/testcases](#) subpages, or in your own [module sandbox](#). The tested changes can be added to this page in a single edit. Consider discussing changes on the [talk page](#) before implementing them.

This module is used in system messages.

Changes to it can cause immediate changes to the Wikipedia user interface. To avoid large-scale disruption, any changes should first be tested in this module's [/sandbox](#) or [40x40px /testcases](#) subpage, or in your own [user space](#). The tested changes can then be added in one single edit to this module. Please discuss any changes on the [talk page](#) before implementing them.

This module is [subject to page protection](#). It is a [highly visible module](#) in use by a very large number of pages, or is [substituted](#) very frequently. Because vandalism or mistakes would affect many pages, and even trivial editing might cause substantial load on the servers, it is [protected](#) from editing.

This module causes an error if any nil [global](#) is read or if any global is written to, with the exception of *arg*. To use, add `<syntaxhighlight lang="lua" inline>require('Module:No globals')</syntaxhighlight>` to the top of the module using it. The *arg* variable is excluded because it is necessary for Scribunto's [require](#) function to work properly. (See the Scribunto source code [here](#).)

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
