# Template:Citation Style documentation/author

From Blue Gold Program Wiki

< [Template:Citation Style documentation](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

- **last**: Surname of a single author. Do not wikilink—use **author-link** instead. For corporate

authors or authors for whom only one name is listed by the source, use **last** or one of its aliases (e.g. `|author=Bono`). Aliases: **surname**, **author**, **last1**, **surname1**, **author1**.

- **author**: this parameter is used to hold the complete name of a single author (first and last) or to hold the name of a corporate author. This parameter should never hold the names of more than one author. Do not wikilink—use **author-link** instead.
- **first**: Given or first names of author; for example: *Firstname Middlename* or *Firstname M.* or *Firstname M., Sr.* Do not wikilink—use **author-link** instead. Aliases: **given**, **first1**, **given1**. Requires **last**; first name will not display if **last** is empty.
- OR: for multiple authors, use **last1**, **first1** through **lastn**, **firstn**, where *n* is any consecutive number for an unlimited number of authors (each **firstn** requires a corresponding **lastn**, but not the other way around). See the **display** parameters to change how many authors are displayed. Aliases: **surname1**, **given1** through **surnamen**, **giveness**, or **author1** through **authorn**. For an individual author plus an institutional author, you can use `|first1=...|last1=...|author2=...`
- **author-link**: Title of existing Wikipedia article about the author—not the author's website; do not wikilink. Aliases: **author-link1**, **authorlink**, **authorlink1**, **author1-link**, **author1link**.
- OR: for multiple authors, use **author-link1** through **author-linkn**. Aliases: **authorlink1** through **authorlinkn**, or **author1-link** through **authorn-link**, or **author1link** through **authornlink**.
- **name-list-format**: displays authors and editors in [Vancouver style](#) when set to `vanc` and when the list uses `last/first` parameters for the name list(s).
- **vauthors**: comma-separated list of author names in [Vancouver style](#); enclose corporate or institutional author names in doubled parentheses:

```
|vauthors=Smythe JB, ((Megabux Corp.))
```

- **author-link** and **author-mask** may be used for the individual names in `|vauthors=` as described above
- **authors**: Free-form list of author names; use of this parameter is discouraged because it does not contribute to a citation's metadata; not an alias of **last**.
- **translator-last**: Surname of translator. Do not wikilink—use **translator-link** instead. Aliases: **translator-surname**, **translator1**, **translator1-last**, **translator-last1**.
  - **translator-first**: Given or first names of translator. Do not wikilink—use **translator-link** instead. Aliases: **translator-given**, **translator1-first**, **translator-first1**.
  - OR: for multiple translators, use **translator-last1**, **translator-first1** through **translator-lastn**, **translator-firstn**, where *n* is any consecutive number for an unlimited number of translators (each **translator-firstn** requires a corresponding **translator-lastn**, but not the other way around). Aliases: **translator1-last**, **translator1-first** through **translatorn-last**, **translatorn-first**, or **translator1** through **translatorn**.
  - **translator-link**: Title of existing Wikipedia article about the translator—not the translator's website; do not wikilink. Aliases: **translator-link1**, **translator1-link**.
  - OR: for multiple translators, use **translator-link1** through **translator-linkn**. Aliases: **translator1-link** through **translatorn-link**.
- **collaboration**: Name of a group of authors or collaborators; requires **author**, **last**, or **vauthors** listing one or more primary authors; follows author name-list; appends "et al." to author name-list.
- Note: When using [shortened footnotes](#) or [parenthetical referencing](#) styles with templates, do not use multiple names in one field, or else the anchor will not match the inline link.

## Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
