Template:Citation Style documentation/display

From Blue Gold Program Wiki

< [Template:Citation Style documentation](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

- **mode**: Sets element separator, default terminal punctuation, and certain capitalization

according to the value provided. For `|mode=cs1`, element separator and terminal punctuation is a period (.); where appropriate, initial letters of certain words are capitalized ('Retrieved...'). For `|mode=cs2`, element separator is a comma (,); terminal punctuation is omitted; where appropriate, initial letters of certain words are not capitalized ('retrieved...'). To override default terminal punctuation use **postscript**.

- **author-mask**: Replaces the name of the first author with [em dashes](#) or text. Set **author-mask** to a numeric value *n* to set the dash *n* em spaces wide; set **author-mask** to a text value to display the text without a trailing author separator; for example, "with". You must still include the values for all authors for metadata purposes. Primarily intended for use with bibliographies or bibliography styles where multiple works by a single author are listed sequentially such as [shortened footnotes](#). Do not use in a list generated by `{{reflist}}`, `<references />` or similar as there is no control of the order in which references are displayed. You can also use **editor-mask** and **translator-mask** in the same way. Mask parameters can take a number in the name of the parameter (e.g. `|authorn-mask=`) to specify which author the mask should apply to.
- **display-authors**: Controls the number of author names that are displayed when a citation is published. To change the displayed number of authors, set **display-authors** to the desired number. For example, `|display-authors=2` will display only the first two authors in a citation. By default, all authors are displayed. `|display-authors=etal` displays all authors in the list followed by et al. Aliases: **displayauthors**.
- **display-editors**: Controls the number of editor names that are displayed when a citation is published. To change the displayed number of editors, set **display-editors** to the desired number. For example, `|display-editors=2` will display only the first two editors in a citation. By default, all editors are displayed. `|display-editors=etal` displays all editors in the list followed by et al. Aliases: **displayeditors**.
- **last-author-amp**: Switches the separator between the last two names of the author list to space ampersand space (&) when set to *y*, *yes*, or *true*. Example: `|last-author-amp=yes`
- **postscript**: Controls the closing punctuation for a citation; defaults to a period (.); for no terminating punctuation, specify `|postscript=none` - leaving `|postscript=` empty is the same as omitting it, but is ambiguous. Additional text or templates beyond the terminating punctuation may generate an error message. `|postscript=` is ignored if **quote** is defined.

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the

Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
