Template:Cite bioRxiv/doc

From Blue Gold Program Wiki

< [Template:Cite bioRxiv](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

This is a [documentation subpage](#) for [Template:Cite bioRxiv](#).

[40px](#) It contains usage information, [categories](#) and other content that is not part of the original template page.

[30px](#) This template uses [Lua](#):
• [Module:Citation/CS1](#)

[Citation Style 1](#) templates

{{Cite arXiv}}	arXiv preprints
{{Cite AV media}}	audio and visual
{{Cite AV media notes}}	audio and visual liner notes
{{Cite bioRxiv}}	bioRxiv preprints
{{Cite book}}	books
{{Cite citeseerx}}	scientific and academic papers
{{Cite conference}}	conference papers
{{Cite encyclopedia}}	edited collections
{{Cite episode}}	radio or television episodes
{{Cite interview}}	interviews
{{Cite journal}}	academic journals and papers
{{Cite magazine}}	magazines, periodicals
{{Cite mailing list}}	public mailing lists
{{Cite map}}	maps
{{Cite news}}	news articles
{{Cite newsgroup}}	online newsgroups
{{Cite podcast}}	podcasts
{{Cite press release}}	press releases
{{Cite report}}	reports
{{Cite serial}}	audio or video serials
{{Cite sign}}	signs, plaques
{{Cite speech}}	speeches
{{Cite ssrn}}	articles with SSRN identifiers
{{Cite techreport}}	technical reports
{{Cite thesis}}	theses
{{Cite web}}	web sources not covered by the above

Usage

Common parameters, horizontal format

```
{ { cite bioRxiv |last1= |first1= |date= |title= |biorxiv=}}
```

- **biorxiv (Mandatory):** bioRxiv identifier. This is the biorxiv [doi](#) stripped of '10.1101/'. Do not use the full doi. That is use |biorxiv=012345, not | nor |doi=10.1101/012345
- **title:** Title of the cited paper.

The template uses the style of `{ { cite journal }}`. Once a paper is accepted in a peer-reviewed journal, it is recommended to use one of those templates, as the peer-reviewed status of the article is important, while preserving the bioRxiv link in order to guarantee open access to the previous version of the article. To preserve the bioRxiv link, add e.g. |biorxiv=012345 to the `{ { citation }}` or `{ { cite journal }}` templates.

Examples

- `{ { cite biorxiv |last1=Navarrete |first1=I. |last2=Panchi |first2=N. |last3=Kromann |first3=P. |last4=Forbes |first4=G. |last5=Andrade-Piedra |first5=J. |date=15 February 2017 |title=Health quality of seed potato and yield losses in Ecuador |biorxiv=108712}}`

Navarrete, I.; Panchi, N.; Kromann, P.; Forbes, G.; Andrade-Piedra, J. (15 February 2017). "Health quality of seed potato and yield losses in Ecuador". [bioRxiv 108712](#) Check |biorxiv= value ([help](#)).

Parameters

Deprecated

```
{ {#lst:Help:CS1 errors|deprecated_params_table}}
```

Description

Authors

- **last**: Surname of a single author. Do not wikilink—use **author-link** instead. For corporate authors or authors for whom only one name is listed by the source, use **last** or one of its aliases (e.g. |author=Bono). Aliases: **surname**, **author**, **last1**, **surname1**, **author1**.
 - **author**: this parameter is used to hold the complete name of a single author (first and last) or to hold the name of a corporate author. This parameter should never hold the names of more than one author. Do not wikilink—use **author-link** instead.
 - **first**: Given or first names of author; for example: *Firstname Middlename* or *Firstname M.* or *Firstname M., Sr.* Do not wikilink—use **author-link** instead. Aliases: **given**, **first1**, **given1**. Requires **last**; first name will not display if **last** is empty.
 - OR: for multiple authors, use **last1**, **first1** through **lastn**, **firstn**, where *n* is any consecutive number for an unlimited number of authors (each **firstn** requires a corresponding **lastn**, but not the other way around). See the [display](#) parameters to change how many authors are displayed. Aliases: **surname1**, **given1** through **surnamen**, **givenn**, or **author1** through **authorn**. For an individual author plus an institutional author, you can use |first1=...|last1=...|author2=....
 - **author-link**: Title of existing Wikipedia article about the author—not the author's website; do not wikilink. Aliases: **author-link1**, **authorlink**, **authorlink1**, **author1-link**, **author1link**.
 - OR: for multiple authors, use **author-link1** through **author-linkn**. Aliases: **authorlink1** through **authorlinkn**, or **author1-link** through **authorn-link**, or **author1link** through **authornlink**.
 - **name-list-format**: displays authors and editors in [Vancouver style](#) when set to **vanc** and when the list uses **last/first** parameters for the name list(s).
- **vauthors**: comma-separated list of author names in [Vancouver style](#); enclose corporate or institutional author names in doubled parentheses:

|vauthors=Smythe JB, ((Megabux Corp.))

- **author-link** and **author-mask** may be used for the individual names in |vauthors= as described above
- **authors**: Free-form list of author names; use of this parameter is discouraged because it does not contribute to a citation's metadata; not an alias of **last**.
- **translator-last**: Surname of translator. Do not wikilink—use **translator-link** instead. Aliases: **translator-surname**, **translator1**, **translator1-last**, **translator-last1**.
 - **translator-first**: Given or first names of translator. Do not wikilink—use **translator-link** instead. Aliases: **translator-given**, **translator1-first**, **translator-first1**.
 - OR: for multiple translators, use **translator-last1**, **translator-first1** through **translator-lastn**, **translator-firstn**, where *n* is any consecutive number for an unlimited number of translators (each **translator-firstn** requires a corresponding **translator-lastn**, but not the other way around). Aliases: **translator1-last**, **translator1-first** through **translatorn-last**, **translatorn-first**, or **translator1** through **translatorn**.
 - **translator-link**: Title of existing Wikipedia article about the translator—not the translator's website; do not wikilink. Aliases: **translator-link1**, **translator1-link**.
 - OR: for multiple translators, use **translator-link1** through **translator-linkn**. Aliases: **translator1-link** through **translatorn-link**.
- **collaboration**: Name of a group of authors or collaborators; requires **author**, **last**, or **vauthors** listing one or more primary authors; follows author name-list; appends "et al." to

author name-list.

- Note: When using [shortened footnotes](#) or [parenthetical referencing](#) styles with templates, do not use multiple names in one field, or else the anchor will not match the inline link.

Date

- **date**: Date of source being referenced. Can be full date (day, month, and year) or partial date (month and year, season and year, or year). Use same format as other publication dates in the citations.^{[\[date 1\]](#)} Required when **year** is used to disambiguate {{[\\$fn](#)}} links to multiple-work citations by the same author in the same year.^{[\[more\]](#)} Do not wikilink. Displays after the authors and is enclosed in parentheses. If there is no author, then displays after publisher. For acceptable date formats, see [Help:Citation Style 1 § Dates](#).

For approximate year, precede with "c. ", like this: |date=c. 1900.

For no date, or "undated", use |date=n.d.

Automatic date formatting: [Citation Style 1](#) and [2](#) templates, including this template, automatically render dates in date parameters (|date=, |access-date=, |archive-date=, etc.) in the style specified by the article's {{[use dmy dates](#)}} or {{[use mdy dates](#)}} template. See those templates' documentation for details.

- **year**: Year of source being referenced. Use of |date= is recommended unless *all* of the following conditions are met:
 1. The |date= format is YYYY-MM-DD.
 2. The citation requires a [CITEREF disambiguator](#).
 3. The template uses |ref=harv or |mode=cs2, or the template is {{[citation](#)}}.
- **orig-year**: Original publication year; displays in square brackets after the **date** (or **year**). For clarity, please supply specifics. For example: |orig-year=First published 1859 or |orig-year=Composed 1904. Alias: **origyear**
- **df**: date format; sets rendered dates to the specified format; does not support date ranges or seasonal dates; overrides the automatic date formatting described above. Accepts one value which may be one of these:

dmy - set publication dates to day month year format; access- and archive-dates are not modified;

mdy - as above for month day, year format

ymd - as above for year initial numeric format YYYY-MM-DD

dmy-all - set publication, access-, and archive-dates to day month year format;

mdy-all - as above for month day, year format

ymd-all - as above for year initial numeric format YYYY-MM-DD

1. ↑ Publication dates in references within an article should all have the same format. This may be a different format from that used for archive and access dates. See [MOS:DATEUNIFY](#).

Title

(See also [Help:Citation Style 1 § Titles and chapters](#).)

- **title:** Title of source. Displays in italics. If **script-title** is defined, **title** holds a [Romanization](#) of title in **script-title**.
 - **script-title:** Original title for languages that do not use a Latin-based script (Arabic, Chinese, Cyrillic, Greek, Hebrew, Japanese, Korean, etc); not italicized, follows italicized Romanization defined in **title**. May be prefixed with an [ISO 639-1](#) two-character code to help browsers properly display the script:

```
... |title=Tōkyō tawā |script-title=ja:東京タワー |trans-title=Tokyo  
Tower ...
```

- **trans-title:** English translation of the title if the source cited is in a foreign language. Displays in square brackets after **title**; if **url** is defined, then **trans-title** is included in the link. Use of the **language** parameter is recommended.

Titles containing certain characters will not display and link correctly unless those characters are encoded.

newline	[]	
space	[]	{!} (preferred)
{bracket text}			| or {{pipe}} - see also Help:Table § Rendering the pipe

- **title-link:** Title of existing Wikipedia article about the source named in **title** - do not use a web address; do not wikilink. Alias: **titlelink**.

- **language:** A comma-separated list of the languages in which the source is written, as either the full language name or the [ISO 639](#) language code , e.g. |language=French or |language=fr, pt-br. [See the list of supported codes and names](#). Do not use templates or wikilinks. Displays in parentheses with "in" before the language name or names. When the only source language is English, no language is displayed in the citation; use of the parameter in this case is discouraged. The use of languages recognized by the citation module adds the page to the appropriate subcategory of [Category:CS1 foreign language sources](#). Aliases: **lang**

TemplateData

This is the [TemplateData](#) for this template used by [TemplateWizard](#), [VisualEditor](#) and other tools. [Click here](#) to see a monthly parameter usage report for this template based on this TemplateData.

TemplateData for Cite bioRxiv

Formats a citation to a paper with an bioRxiv id

Template parameters

This template prefers inline formatting of parameters.

	Parameter	Description	Type	Status
bioRxiv	biorxiv	bioRxiv identifier without the "bioRxiv:" prefix Example 108712	String required	
Author	author author1	Complete name of the first author	String optional	
First name	first first1 given given1	First name of first author	String suggested	
Last name	last last1 surname surname1	Last name of first author	String suggested	
Author 2's first name	first2 given2	First name of second author	String optional	
Author 2's last name	last2 surname2	Last name of second author	String optional	
Author 2	author2	Full name of second author	String optional	
Author's article	author-link author-link1 authorlink authorlink1 author1-link author1link.	Title of the Wikipedia article about the first author	Page optional	
Author 2's article	author-link2 authorlink2 author2-link author2link	Title of Wikipedia article about the second author	Page optional	
Authors	authors	Full list of all authors	String optional	
Co-authors	coauthors	Names of co-authors	String deprecated	
Title	title	Title of the paper cited	String suggested	
Translator	translator translator1	Full name of first translator	String optional	
Translator's last name	translator-last translator1-last translator-last1	Translator's last name	String optional	
Translator's first name	translator-first translator1-first translator-first1	Translator's first name	String optional	
Translator's article	translator-link translator-link1 translator1-link	Title of Wikipedia article of the (first) translator	Page optional	
Translator 2's First name	translator-first2 translator2-first	Translator 2's First name	String optional	
Translator 2's last name	translator-last2 translator2-last	Translator 2's last name	String optional	
Translator 2	translator2	Full name of second translator	String optional	
Translator 2's article	translator-link2 translator2-link	Title of Wikipedia article about second translator	Page optional	

	Parameter	Description	Type	Status
collaboration	collaboration	Name of a group of authors, in addition to the ones listed in the Author parameters	String	optional
Date	date	Date of the source being cited. Use n.d. for no date, and c. for inexact dated	String	optional
Original publication year	orig-year origyear	Original publication year, which displays after the main date. Be specific Example First published 1859	String	optional
Date format for publication dates	df	Either ymd (Year-Month-Day), dmy (Day-Month-Year), or mdy (Month-Day-Year) add -all at end to also affect access and archive dates Example dmy	String	optional
Foreign-script title	script-title	Title of work in original non-latin script. May be prefixed with language code and a colon Example ja:日本語	String	optional
Translated title	trans-title	English translation of title	String	optional
Article about title	title-link	Wikipedia article that the title is linked to	Page	optional
Language(s)	language	Language(s) the source is written in. Separate by commas, and do not include 'and'	String	optional

Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
