# Template:Navigation bar/doc

From Blue Gold Program Wiki

< [Template:Navigation bar](#)

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

**This is a [documentation subpage](#) for [Template:Navigation bar](#).**

[40px](#) It contains usage information, [categories](#) and other content that is not part of the original template page.

**This template is used in [MediaWiki:Categoriespagetext](#).**

Changes to it can cause immediate changes to the Wikipedia user interface. To avoid large-scale disruption, any changes should first be tested in this template's [/sandbox](#) or [/testcases](#) subpage, or in your own [user space](#). The tested changes can then be added in one single edit to this template. Please discuss any changes on the [talk page](#) before implementing them.

This template employs CSS style attributes that may display differently on different browsers. Please test all changes with multiple browsers including at least IE 6, IE 7, Firefox, Safari, and Opera. Any experiments should be conducted in the [template sandbox](#) or your user space.

This template is a navigational template intended to be used to generate a scrollable navigation "bar", rather than a navigation box, in cases where there are a long list of items with a natural ordering (for example, alphabetical or numerical) that as a box would consume a large amount of vertical space in an article. Navigation bars currently do not appear in printed copies of articles.

When creating a template using this one, please add it to [Category:Templates using navigation bars](#) by adding the following code:

```
<noinclude>[[Category:Templates using navigation bars|{{PAGENAME}}]]</noinclude>
```

## Usage

```
{{navigation bar
| color =
| title =
| list =
| category =
}}
```

## Mandatory arguments

- title: A title for the navigation bar; may include links
- list: Single line of text (no tables, no expanded templates) with links to related articles **with no embedded line breaks**; links may be separated, for instance, by commas, bullets, or pipe symbols. To use pipe symbols (vertical bars) as a separator, [template:!](#) must be used since "|" has meaning within a template invocation. The syntax for displaying a pipe-character is `{{!}}`. If you want to use several lines simply surround each line with div tags (following example only uses one div).

```
{{Navigation bar
| title = Sample
| list = <div>
item 1 - item 2 - item 3 - item 4 - item 5 -
item 6 - item 7 - item 8 - item 9 - item 10 -
item 11 - item 12 - item 13 - item 14 - item 15 -
item 16 - item 17 - item 18 - item 19 - item 20
</div>
}}
```

which produces

## Sample

- item 1 - item 2 - item 3 - item 4 - item 5 - item 6 - item 7 - item 8 - item 9 - item 10 - item 11 - item 12 - item 13 - item 14 - item 15 - item 16 - item 17 - item 18 - item 19 - item 20

## Optional arguments

- color: The color to use for the title bar. This color parameter defaults to the color shown in the {{{title}}} line above.
- category: A category all articles using this template will be added to.

## Blue Gold Program Wiki

The wiki version of the Lessons Learnt Report of the Blue Gold program, documents the experiences of a technical assistance (TA) team working in a development project implemented by the Bangladesh Water Development Board (BWDB) and the Department of Agricultural Extension (DAE) over an eight+ year period from March 2013 to December 2021. The wiki lessons learnt report (LLR) is intended to complement the BWDB and DAE project completion reports (PCRs), with the aim of recording lessons learnt for use in the design and implementation of future interventions in the coastal zone.
